

GitHub / git integration with Eclipse.

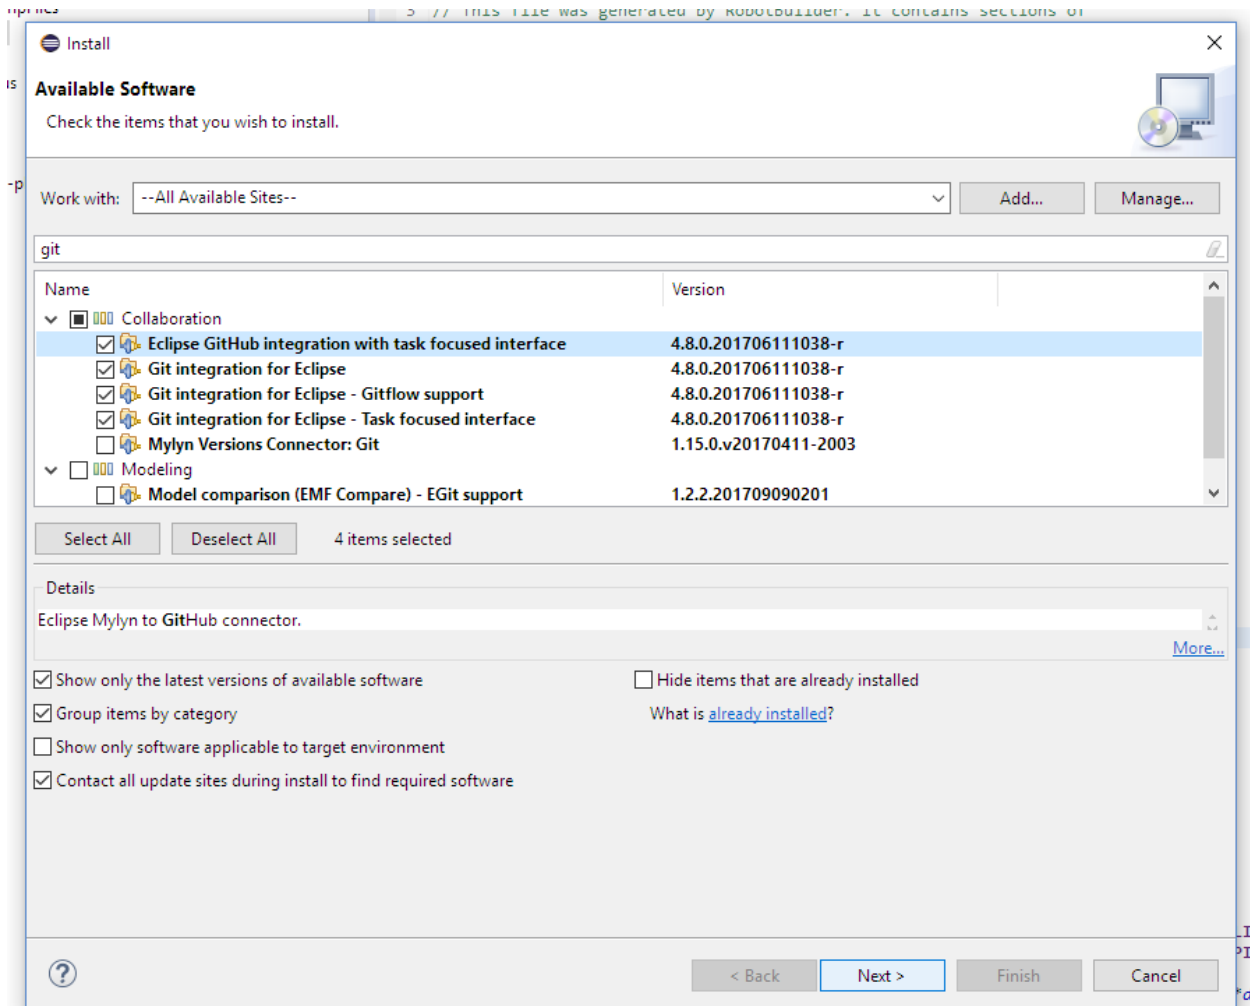

1. Open Eclipse
2. Help -> Install New Software

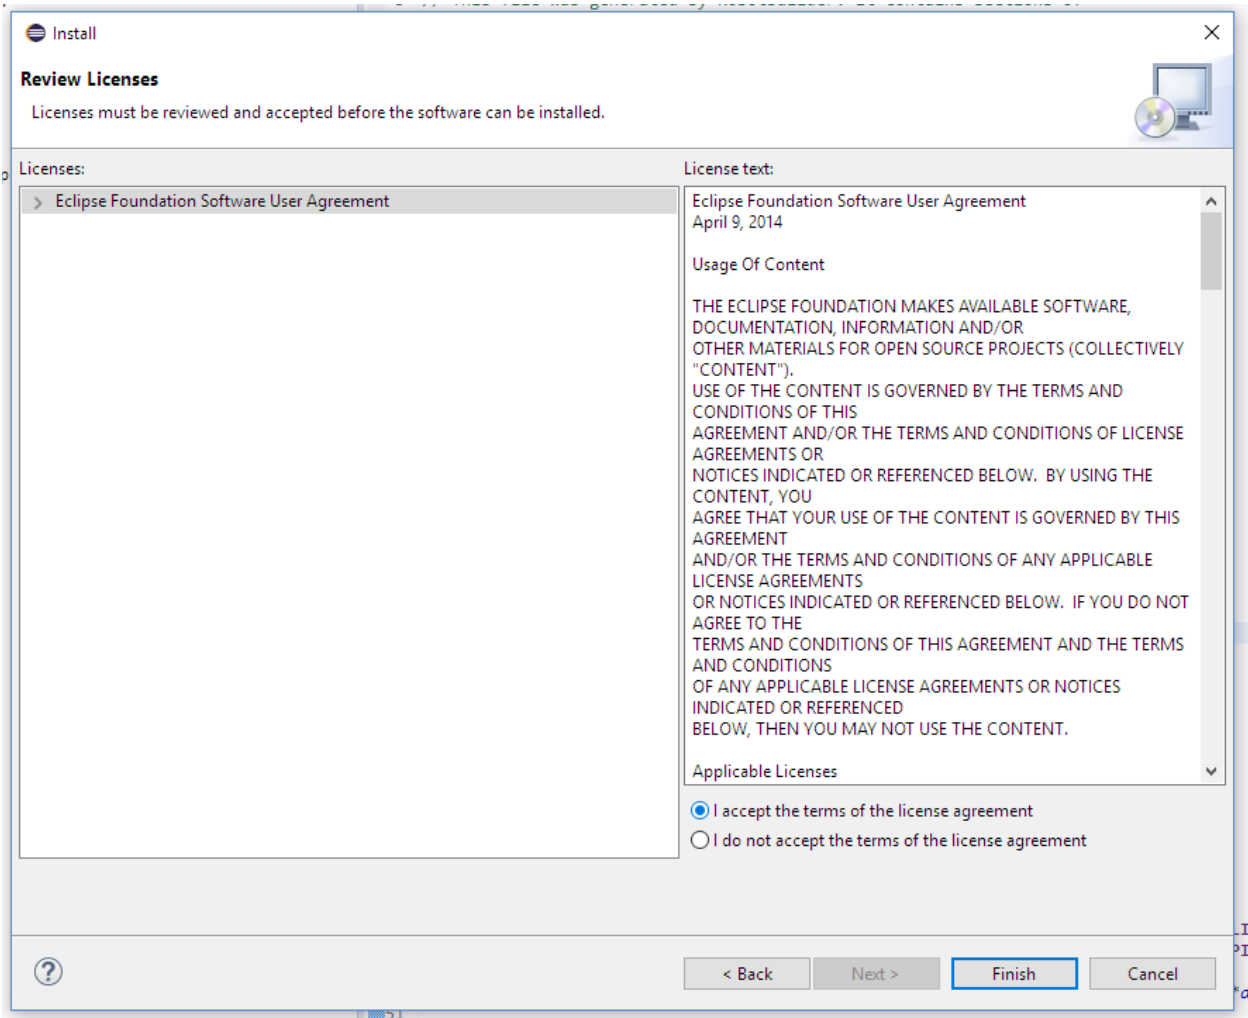

3. Change Work with: to “--All Available Sites—”

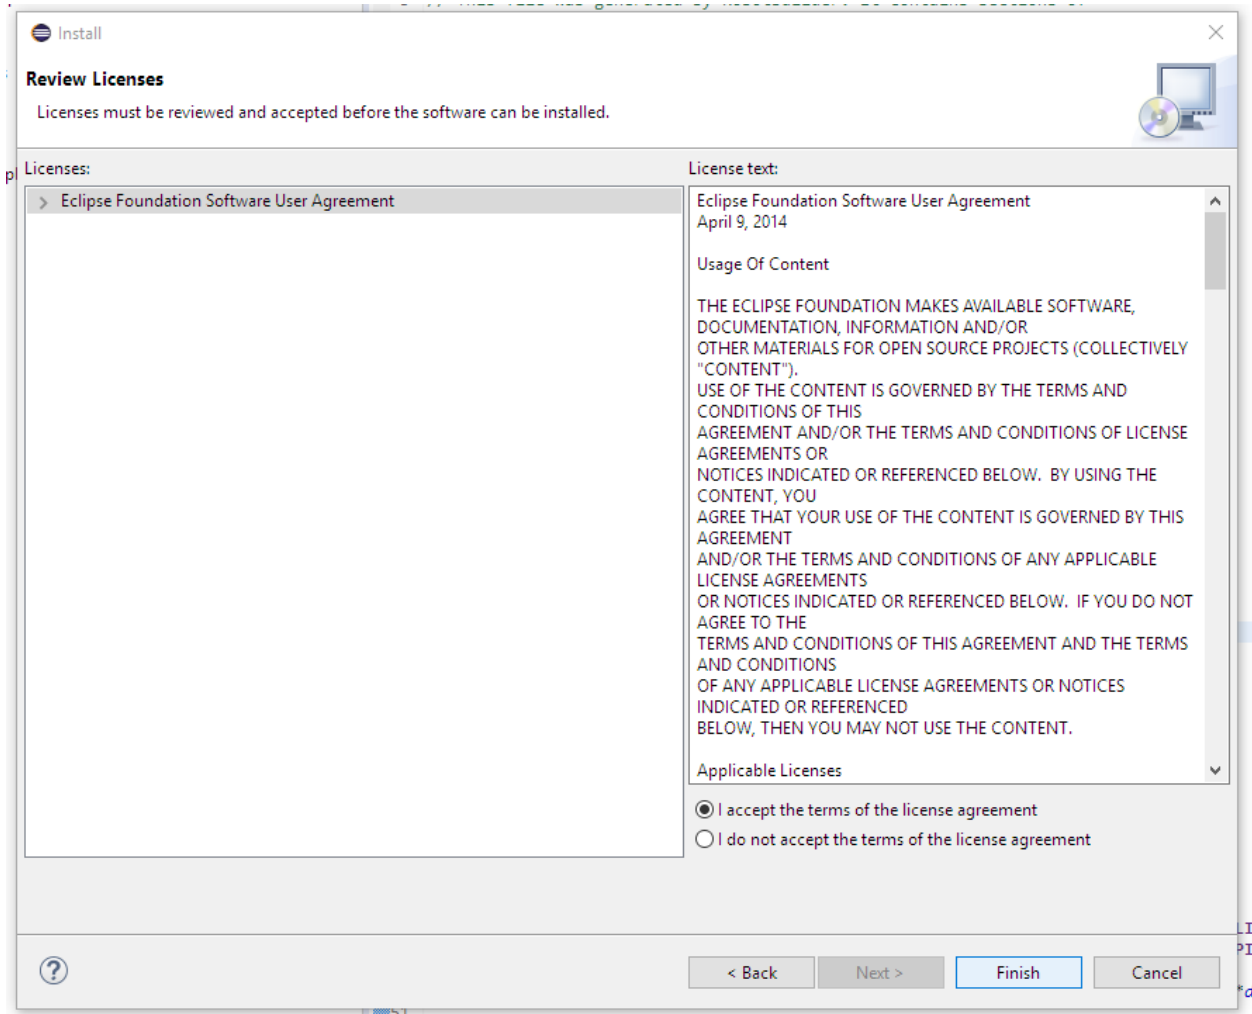

4. Enter “git” in search box directly below Work With: then hit Enter key.
 - a. This will restrict the items displayed to those with “git” in the title.
5. Put check marks in the following software items.
 - a. Eclipse GitHub integration with task focused interface.
 - b. Git integration for Eclipse
 - c. Git integration for Eclipse – Gitflow support
 - d. Git integration for Eclipse – Task focused interface
6. Push “Next >” button at the bottom of the window.

7. Push “Next >” button at the bottom of the window.
 - a. Note: This step may notify you that some or all of the components are already installed, this is ok, push next.

8. Read license text and if you agree, put check mark in “I accept the terms of the license agreement”.
9. Push “Finish” button at the bottom of the window.

10. Eclipse will execute the changes you requested. You may monitor the status in the lower right-hand corner of the eclipse window.

11. Push “Restart Now” when window stating a restart of Eclipse is required for the changes to take effect.

12. If the Welcome / Overview window appears when Eclipse starts back up, click on X to close the window and return to task focused interface.

At this point your Eclipse now can now interact with GitHub and git repositories directly. Depending on your prior use of git and GitHub, the actions required to incorporate your source code into git, GitHub and Eclipse will vary. Please use the appropriate section below to complete the integration of your source code into git, GitHub and Eclipse.
